

Line up the motor mount arm with the holes on the platform and mount the two knobs as shown.

Lift up the belt brackets on each end clamp.

Loosen the belt clamp and insert the belt with the teeth facing down. Tighten knob to secure.

Weave the belt through the motor mount pulleys as shown.

Pull tight on the belt. Loosen opposite belt clamp and inset the belt into the clamp with the teeth facing down. Tighten the knob to secure.

To install the motor, place the motor drive belt around pulley as shown.

Tighten the motor mount knobs to secure

Drag module can be mounted by wrapping belt around pulley as shown and tightening knobs in back to secure.

Tighten the knob clockwise to increase tension.
